

VATIER™

Password Management

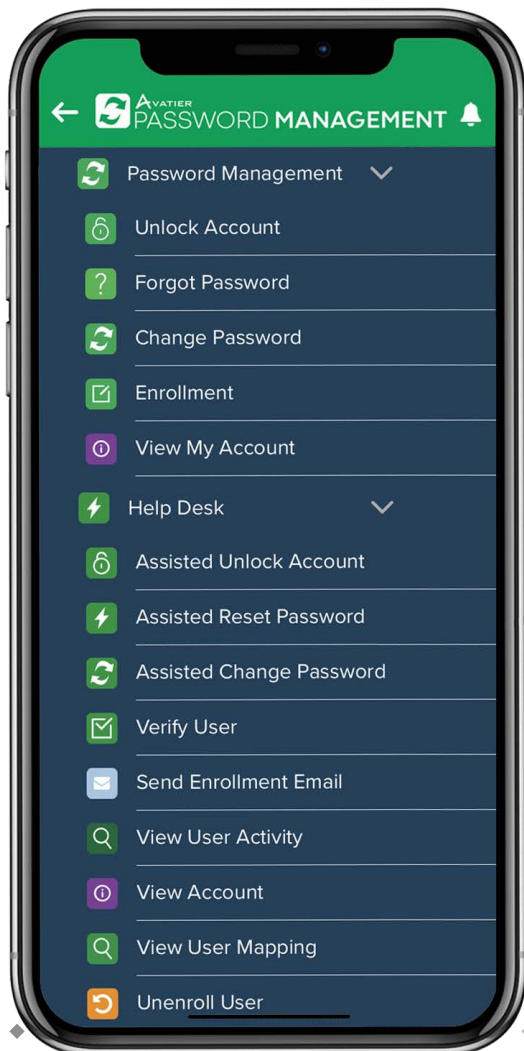

as a Docker Container

PASSWORD MANAGEMENT

Avatier Password Management Docker container cloud-Independent solution brings employees, partners and customers applications passwords together to manage them as one system. More importantly, our unified password management digital dashboard enables C-level executives to deliver business growth and increased profits.

Avatier Identity Anywhere Password Management

Introducing Identity Anywhere Password Management, the world's first Password Management based on Docker containers, making it the most portable, scalable and secure solution possible. Docker container technology allows our Password Management to run anywhere: on any cloud, on premise or a private cloud instance hosted by Avatier.

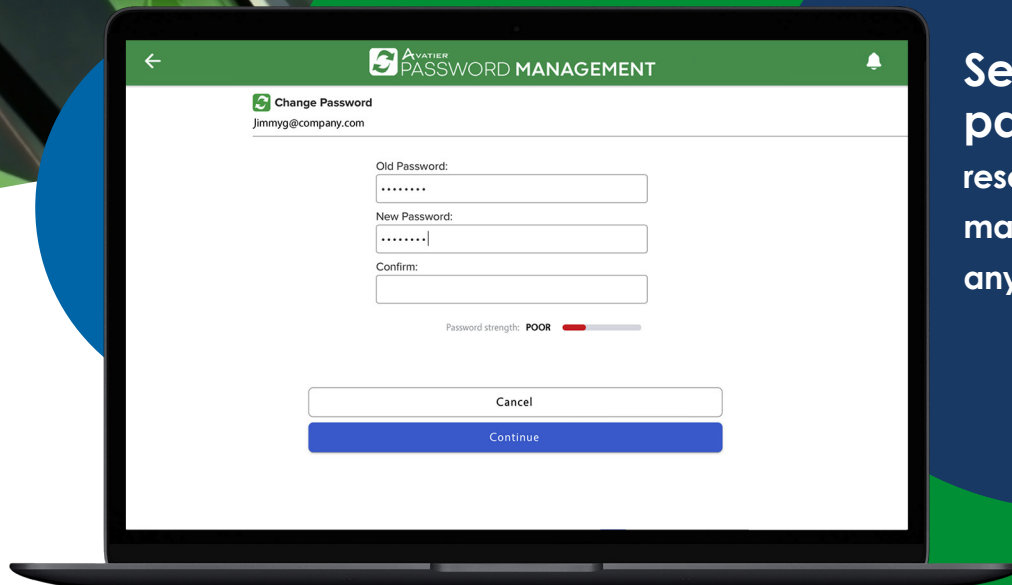

Over 20 Years of Password Management Experience

Simply put there is no other Password Management product with as many business focused features as our solution. Review our feature matrix. Our almost two decades of experience has enabled our Password Management to work across very diverse industries with simple requirements like mass enrollment for over 1 million identities to managing complex environments with over 250 enterprise, custom and cloud application connectors, each with their own password complexity requirements.

Multi-lingual Support and Amazing Branding

Let's face it everyone is doing business internationally and that requires a Password Management solution that easily supports multilingual users. Only Avatier's solutions truly supports over 32 languages.

**Self-service
password reset**
reset, synchronize, and
manage passwords
anytime, anywhere.

Avatier Password Management

Universal MFA and Biometric User Identification Options

Avatier Password Management includes free question and answer and alternative email identity validation which works well for people without cell phone access. Only Avatier provides free SMS One-Time Password (OTP) as well as support for Infobip, Twilio, and Tropo SMS providers. If free is not good enough, we support Microsoft Auth, DUO, Symantec VIP, RSA, Google Auth and many more MFA providers. Biometric support includes finger print, voice, and face from any iPhone and android.

Mac and Windows Off-Network Password Reset Support

What happens when your users forget their VPN or network password when they are working from home or traveling? Avatier Credential Provider Password Kiosk™ allows users to securely reset their forgotten password from the privacy and convenience of their Windows or Mac pre-logon screen. Prevent your logon session from locking out and affecting access to Outlook, network resources, and directory folder replication. Automatically synchronize your locally cached domain password credentials.

Cloud-only identity is not enough:

- Legacy on-premise systems
- Governed by tight compliance
- Lack of trust in cloud security

The hybrid identity crisis:

- Legacy maintenance and upgrades
- Separate cloud/on-premise models
- Labor intensive operations management
- Lacks CPU memory auto-scaling
- Manual updates
- Requires load balancer management
