

“Our goal is to provide streamlined Identity Management solutions that accelerate measurable business results to our customers while providing the highest degree of integration and flexibility.”

–Nelson Cicchitto, CEO and Founder of Avatier Corporation

## Business

For over 25 years, Avatier has demonstrated leadership in delivering enterprise Identity and Access Management (IAM) solutions and an identity management platform that enables information technology operations through workflow automation and self-service. Avatier automates workflow and compliance reviews to reduce IT security risks.

## Why Avatier

Avatier software solutions allow everyday administrative tasks to be streamlined, simplified, and delegated. Avatier products expand network security through enhanced policies, powerful auditing, extensive reporting and appropriately delegated management capabilities.

Our customers have validated that our products are the:

- Easiest to internalize and maintain
- Least consulting intensive
- Most cost effective with ongoing and measurable ROI
- Best at auditing and reporting
- Most flexible without requiring programming
- Best internationalized solution
- Highest in customer satisfaction and success
- Fastest to deploy

## Avatier Identity Anywhere *Built with Docker Containers*

The Identity as a Container (IDaaS) Platform provides the speedy deployment and continuous delivery benefits of cloud-only (IDaaS) providers but with greater control over your identity repository while delivering maximum security and flexibility at the lowest total cost of ownership in the industry. Containers run anywhere on premise or in any cloud.

## Core Values

Our core values reflect what is key to us as an organization and define our everyday actions:

- Kindness
- Curiosity
- Integrity

## Benefits

Avatier products help customers:

- Save money
- Meet Compliance
- Eliminate Waste
- Increase Security
