About Avatier

We are the leading workforce driven identity management company. Avatier’s Identity Anywhere is a cutting-edge identity management platform with a patent-pending user experience framework that secures and simplifies IT operations through orchestration, push notification automated workflows, and user-friendly self-service options. Offering a seamless, secure, and scalable experience, it leverages the latest software innovations to provide a robust identity foundation for user lifecycle management, access requests, orchestration, single sign-on, self-service password management, vendor-neutral passwordless Windows workstation login, MFA migration management, and access governance. Whether operating in the cloud or on-premises, the platform integrates effortlessly with your favorite apps and devices, and ensures rapid deployment within 14 days or less, complemented by personalized support from our expert team.
